# CONTACT CENTER INTELLIGENCE LAYER

## Intelligent Alerting

Monitor and automatically alert on customer conversation deviations in real time.

## Agent Assistance

Improve your agent efficiency by over 50% across chat and email channels with dynamic routing and pre-prepared responses

## Automated Quality Reviews

EdgeTier AI can examine every customer interaction to assess agent quality, performance, and processes

## Customer Attitudes

Use NLP to understand what is driving positive and negative customer experiences in your business

## Query Triage

EdgeTier AI can label, prioritise, and route inbound customer queries to the optimum agent at the right time.

## Data Formatting

Measure to improve. Extract and format your customer service data in an accessible and reportable fashion. Enable your data teams.

## Conversation Monitoring

Track every interaction in real time, and set alerts for topics of interest. Know immediately when topics of interest arise.

## THE EXPECTATION

Deliver high-quality customer satisfaction

React to issues immediately

Report on, and improve, customer  
experience

Be a source of knowledge for the entire  
company

## THE EXPECTATION

Deliver high-quality customer satisfaction

React to issues immediately

Report on, and improve, customer experience

Be a source of knowledge for the entire company

## THE REALITY

Fixed dashboards – slow to react

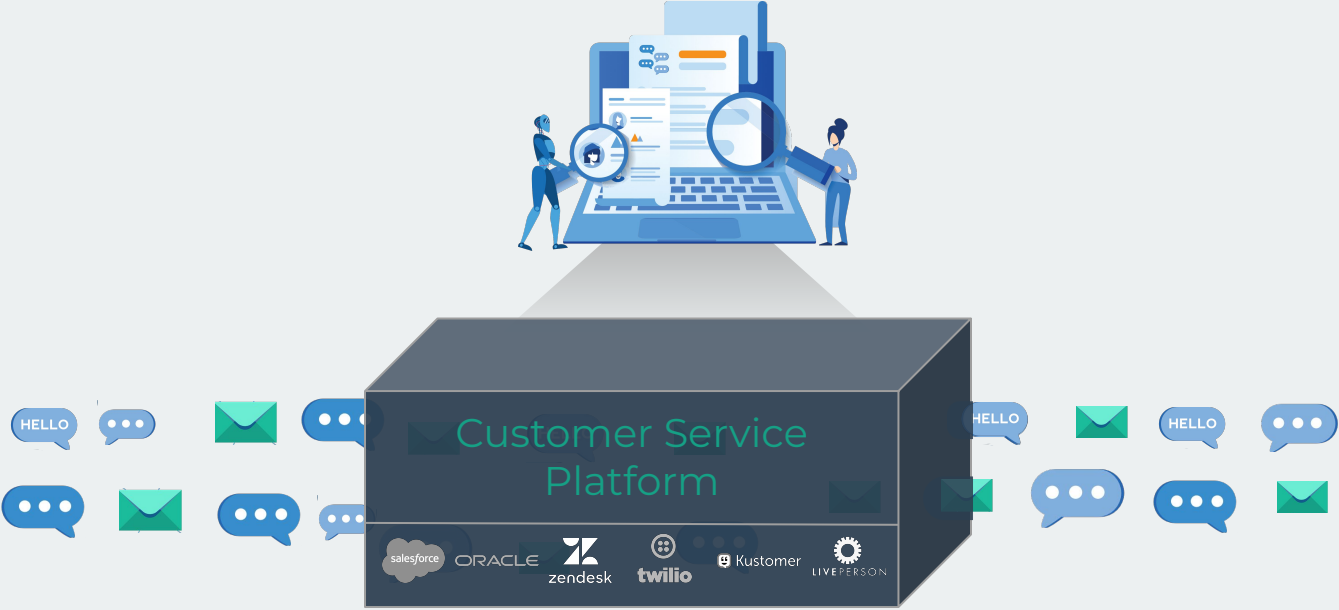

Missed customer issues

Poorly labeled contact reasons

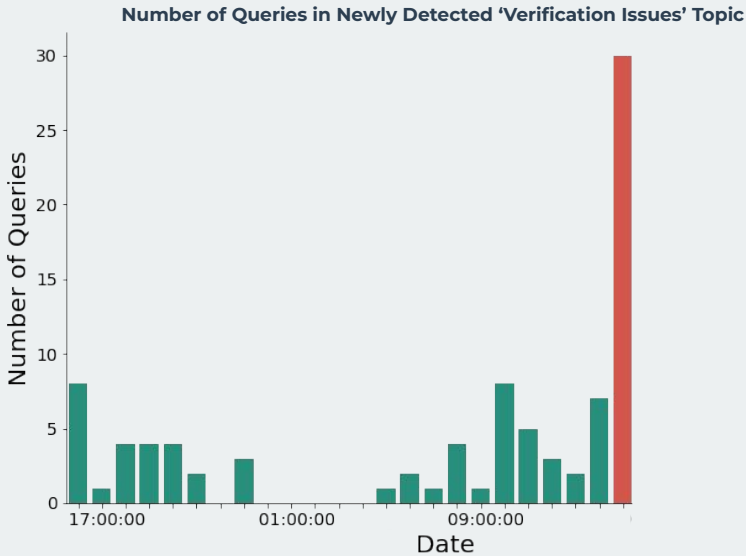

Manual reviews

Randomly asking agents

# EDGETIER TELLS YOU WHAT YOU NEED TO KNOW

# ALERT EXAMPLE: VERIFICATION ISSUES

In the last 10 minutes, there has been an **increase in contacts about a new topic.**

**Here are the most relevant queries:**

- Hello, I keep getting **verification error** messages, but I had already been **verified**...
- Good evening ... I have a question: Why do I keep getting the information that I should **verify** myself with you? I have already been **verified** & had sent you ID etc. back then
- I have tried several times to **verify** myself using the proposed app. Unfortunately, so far without success. I do not have online banking. Is there still a way I can verify myself ???
- ...

**No significant increase in overall chat volume**

**Top Queue Changes**

Italy Queue: 92% (up 45%)  
 France Queue: 4% (down 75%)  
 Germany Queue: 5% (down 93%)
